

## New Tire Handling Truck Going to Panama

All functions of the crane can be easily manipulated with the controls that are located outside the unit.

We outfitted this tire handling crane truck with 4 underbody tool boxes, roll out drawers for valves and hardware, and an air compressor. The crane is a Maxi Duty with 17,059 lb. @ 17' reach and 29,000 lb. @ 10' reach.

## J&J Flat Bed Installed with HIAB Crane

When not in use, the crane is stored behind the cab for safety and while truck is being driven.

Tri County Motor Sales provided the International chassis and J&J Truck Equipment installed a 24'-4" long flat bed and a HIAB knuckle boom crane that includes a 2-section hydraulic boom that extends to 25'-4" and telescopic outriggers that manually extend to 14'-9." The customer will use this truck to serve the mining industry.

## Keep Your Roadways Safe

J&J Truck Equipment is an authorized dealer for the AccuBrine System. It is a highly effective solution for combating snow and ice on the roadways. The AccuBrine automated brine maker is an investment that produces valuable returns in the safety of roads and overall reduction in operational costs and headaches. Call us today for a demo and more information.
